**GREEN MINDED CONSUMERS CAN BOOST BYE BYE STANDBY HOME
ENERGY-SAVING KIT WITH NEW 'SMART EXTENSIONS' RANGE**

*Average UK household is responsible for enough CO2 emissions each year to fill six
hot air balloons**

Following the success of the Bye Bye Standby® Energy Saving Kit, Domia Group today reveals the addition of seven “smart extensions” to its energy saving range all designed to create a fully integrated energy-saving system for eco-friendly homes and offices.

The new Bye Bye Standby® ‘smart extensions’ include innovative energy saving gadgets such as a motion sensor, wall switch, key-fob remote control, lamp dimmer and a heavier duty socket (3000W/13 amp). A dual pack of 1000W/4amp sockets and a spare remote control is also available.

Consumers can now expand on their basic Bye Bye Standby® energy-saving kit which allows you to remotely cut power to electrical devices that are in standby mode. All of the new extension products work wirelessly via an RF signal to ensure easy installation while avoiding any disruption or extra DIY in the home/office.

“Our new energy-saving range provides an affordable, simple solution for anyone wanting to take simple measures to reduce their carbon footprint and “green their home”, said Geoff Ellis, Director for Bye Bye Standby®. “By using Bye Bye Standby®, the average household can save around £38 per year and reduce their carbon emissions by at least 166kg per annum. In a world of rising energy prices and global warming saving money and energy makes sense.”

About Bye Bye Standby®: www.byebyestandby.co.uk

Bye Bye Standby® is an energy saving product which allows you to remotely cut power to electrical devices when in standby mode. Bye Bye Standby® is part of the Domia Group – a home control specialist and leading developer of smart energy solutions. Independent research shows that Bye Bye Standby® will save the average UK family household £38 a year, which could represent as much as £940million across the nation.

*The average household in the UK is responsible for about six tonnes of CO2 emissions every year - enough to fill six hot air balloons 10 metres in diameter.
